1. The Report of the Director of Institute Prof. Sergey Maskevich on the activity of ISEI BSU during 2016-2017.

Prof. Sergey Maskevich made a report about the work and activities in ISEI BSU in the past and current year. He noted the directions of scientific research and projects, which are carried out in the Institute. He also defined the tasks which have to be solved in the future. The Director expressed his gratitude to the International Advisory Council for the assistance in consolidation and development of material and technical resources as well as of educational basis of the ISEI BSU.

2. The Report of Prof. Jan Szyszko on the directions of work of the International Advisory Council during 2016-2017.

Prof. Jan Szyszko reported that the main task of his work as a Head of IAC is the organization of the assistance for ISEI BSU in the way that it becomes one of the leading Institutes on the environmental education and in environmental research in the Republic of Belarus. In education and science, apart from the large field concerning radiation effects and protection, the areas of chemical pollution and burdens to the environment and particularly the possibilities and the use of

regenerative energy sources should be developed and broadened. Prof. Szyszko gave a short introduction of the activities all members of the International Advisory Council and expressed personal gratitude for their contribution and cooperation.

2.2 IAC future activities

All present members of the Advisory Council put forward proposals to the development of further cooperation with ISEI BSU:

- preparation of the projects on carrying ERASMUS +;
- joint guidance of PhD project and its financial support (scholarship);
- assistance in the organization of undergraduate and Master's degree student internships abroad;
- joint work on the organization publication in the Europeans Journals;
- joint work to the enhancing the image of scientific journal of BSU «Ecology»;
- assistance in creation of innovative educational and scientific complex on ul. Irkutskaya, 65a (directions: energy efficient technologies and biotechnologies);
- assistance in the organization of undergraduate and Master's degree student internships abroad.
